

Youth Projects

Department of
Plant and Soil Sciences

Goals

- Increase awareness of agriculture and soil & water conservation
- Increase interest in agriculture and soil & water conservation
- Increase number of qualified specialist entering the job market

Current

- **Plant Science Academy**
 - High school students work side by side in the field with our plant and soil scientists

- **Community Field Day**
 - Primary school students and their families meet plant and soil scientists and discover how agriculture impacts everyone

New

- **Oklahoma Land, Range, and Crop Management Youth Field Day**
 - 4-H and FFA members improve their skills in soil classification and plant identification

Pending

- **Improving Conservation through Experimentation (ICE)**
 - youth develop soil and water conservation projects and compete for a travel grant to the Oklahoma No-Till Conference and Plant and Soil Sciences scholarships

Support

- Spread the word to interested teachers and youth
- We are actively seeking support for these projects
- A sponsor can support a specific project(s) or all projects
- The ultimate goal is to endow all of the projects
